FINAL WEBSITE STRUCTURE (OWNER VIEW)

1. WHAT THE WEBSITE IS

ShowMeUganda.com is a Uganda travel discovery website.

It shows:

- Hotels
- Tours and itineraries
- Travel stories and blogs
- Destinations
- Events
- Conservation content

Everything is organized and managed by the owner.

2. HOW THE SYSTEM WORKS (SIMPLE FLOW)

STEP 1: OWNER ADDS CONTENT

The owner logs into a private control area and adds:

- a post
 - a hotel
 - a tour
 - or a travel story
-

STEP 2: SYSTEM STORES IT

The website automatically saves the content.

STEP 3: WEBSITE DISPLAYS IT

The content instantly appears on:

- Home page
- News & Stories
- Tours
- Directory
- Events
- Conservation

No manual updating needed.

3. WEBSITE SECTIONS (PUBLIC VIEW)

Home Page

Main discovery page showing:

- Featured travel posts
- Popular hotels
- Tour highlights
- Latest stories
- Trending destinations

Everything is scrollable and visually rich.

News & Stories

- Travel articles and blog posts
 - Uganda travel experiences
-

Directory

- Hotels
-

- Tour companies
 - Travel service listings
-

Tour & Packages

- Travel itineraries
 - Safari packages
 - Tour experiences
-

Events

- Festivals
 - Tourism events
 - Cultural events
-

Conservation

- Wildlife stories
 - National parks
 - Environmental protection content
-

Contact Page

- Simple contact form
-

Shop

- Not active yet (future idea)
-

4. USER EXPERIENCE (VERY IMPORTANT ADDITION)

VISITORS (PUBLIC USERS)

Visitors:

- Can freely browse everything
 - Can read posts and explore content
 - Can search for anything on the website
-

LIKES & COMMENTS SYSTEM

Important behavior:

When a visitor tries to:

- Like a post 
- Comment 

The system checks:

⚠ IF user is NOT identified:

A small message appears:

“Continue to like or comment”

Then user can:

- Continue as guest
 - Or continue using email / Google (future option)
-

⚠ IF user is already identified:

- They can like instantly
 - They can comment instantly
-

SIMPLE RULE:

Browsing is open.

Engagement (like/comment) requires identity.

5. SEARCH FUNCTION

The website includes a search bar.

Users can search:

- Hotels
- Tours
- Destinations
- Posts
- Events

It returns matching results instantly.

6. OWNER CONTROL AREA (PRIVATE)

Only the owner can:

- Add new content
 - Edit content
 - Delete content
 - Manage categories
 - View all posts
-

OWNER ALSO SEES:

- Total posts
 - Posts per category
 - Monthly activity (basic overview)
-

7. CONTENT ORGANIZATION (VERY IMPORTANT)

All content is grouped into:

- News & Stories
- Directory
- Tours & Packages
- Events
- Conservation

Each post is automatically placed into the correct section.

8. FINAL SYSTEM BEHAVIOR

When OWNER adds content:

- It is saved
 - It automatically appears on the website
-

When USER visits:

- They browse freely
 - They search
 - They open posts
 - They can like/comment (if identified)
-

9. SIMPLE SYSTEM SUMMARY

- Owner controls everything
- Website shows content automatically
- Users browse freely
- Engagement requires identity (like/comment)
- Search works across everything
- Everything is organized by categories

Summary

ShowMeUganda.com is a simple, automated travel content website where the owner manages content, and users discover and interact with Uganda travel information in a clean and modern experience.
